ACKNOWLEDGEMENTS

The material presented here was derived from a variety of sources, in addition to personal experience and opinion. Much of the information concerning the early history of AGID was derived from the publication by de Vletter and Berger (1980), with additional details provided by Tony Berger, Tony Reedman (current AGID secretary-Treasurer) and Shrikant Limaye (Past-President, AGID). I am grateful for their encouragement in choosing the global geoscience topic for my presidential address. The following individuals also provided encouragement, as well as relevant information on the topics noted: Jim Teller (YEAR); Charles Gower (Canadian participation in IGCP); David Hastings (the role of volunteers). Saley Lawton of PDAC provided advice on finding information on the international mineral industry. The IUGS and IGC websites were the sources of much valuable detail on those organizations.
