HISTORY OF CANADIAN TECHNOLOGY AT QUEEN'S UNIVERSITY

Professor George Richardson has developed a course at Queen's (in the Faculty of Applied Science) on the History of Engineering in Canada. A full-year course, it was introduced in 1976 and is offered annually to some 25 thirdand fourth-year students of engineering, arts, and science. Approximately one-third of the course is devoted to the history of transport technologies and another third to mining in Canada (Richardson's specialty). Copies of his course syllabus may be obtained by writing him c/o the Department of Engineering Drawing, Faculty of Applied Science, Queen's University, Kingston, Ontario.

MEDICINE IN CANADA

To the Readers:

I am preparing a bibliography of secondary sources in the history of Canadian medicine and health care. The scope is intended to be as broad as possible: included will be theses and published material of any kind -- journal articles, monographs, book chapters, pamphlets, etc. The bibliography is intended to encompass the entire time span of Canadian history, including references to aboriginal medicine; geographically, the present boundaries of Canada will circumscribe the boundaries of the project.

All of the common sources for references have been or will be consulted, including the complete runs of periodicals such as the <u>Canadian Historical Review</u>, <u>L'Union Medicale du Canada</u>, the <u>Canadian Medical Assocation</u> Journal, the journals devoted to medical history, the various provincial historical journals, and similar periodicals. However, it is evident that much material has been published in less obvious sites; there would include articles in journals published outside Canada, contributions to the publications of local or regional historical societies, and journals, books, and book chapters for which the journal or book title is such as to make it unlikely to be examined for references for such a bibliography.

The purpose of this note is to request readers to submit full bibliographic details (and reprints or xerox copies if possible) of any items thought to be suitable. The aim of the project will be not only to provide a printed checklist, but also to store and cross-index all references so that pertinent information will be available to scholars on request. It is also intended that the project will be maintained and expanded continuously once the bulk of the data is on file. Any items considered appropriate should be sent to the undersigned:

> Charles G. Roland, MD Hannah Professor of the History of Medicine, 3H56-HSC, McMaster University Hamilton, Ont. L8S 4J9
